

## Hints for Stamping on Resin

- Remember Murphy's Law! Before stamping every piece of your best customer's 1,000-piece order, we strongly recommend that you test on a small sample of the goods.
- Clean the surface of resin beads, with soap and water and let dry.
- Using the rubberstamp of your choice, hand stamp the bead with a permanent inkpad such as StazOn™.
- Another option is stamping with an acrylic paint such as Lumiere by Jacquard®. Use a cosmetic sponge to carefully apply this thick paint onto the rubber stamp. Stamp the image onto the resin bead and allow the paint to dry completely.
- Also experiment with flexible unmounted stamps on curved bead surfaces.
- When dry, coat with a matte-finish spray sealer such as Krylon®.

Stamped images from Cavallini Paper Co®, Stampa Rosa, Zettiology, and Renaissance Art Stamps.

Some of the resin beads we offer:

<b>Stock #</b>	<b>Description</b>
27-012	Coins
27-030	Rectangles
27-033	Flat Diamonds
27-045	Shells
