

“Celestial Sphere” Earrings

As seen in the 2007 Summer Supplement
(Updated 11-08)

Created by: Jill Zisumbo

Suggested Materials:

<u>Qty.</u>	<u>Stock</u>	<u>Name</u>
2	#21-671-601	20mm faceted gemstone donuts, lab-grown amethyst
2	#41-530-07	Small fan-shaped donut bails, sterling silver
2	#42-550-51-2	Flat wire spiral connectors, sterling silver
2	#34-599	French hook ear-wires with ball end, sterling silver
4	#37-295-450	5mm jump rings, sterling silver

Tools: round-nose pliers

To make this design:

1. Open the fan-shaped donut bails just enough to insert an amethyst donut in each. Insert the donuts.
2. Close each bail and attach a jump ring to each (make sure to put the jump ring through both loops of the bail). Attach a spiral connector to each jump ring, and then close the jump rings.
3. Attach another jump ring to the top of each spiral connector and complete your earrings by attaching the French hook ear wires to these top jump rings.

TIP: You may want to apply some Tool Magic™ anti-scratch rubber coating (#69-160) to your round-nose pliers. This is a great way to protect wire and other findings from being damaged while you're manipulating them with pliers.
