1	41-151-98-20-8	Center-crimp tube with hook, copper plate
14"	61-502-02	2mm leather cord, black

**Tools and supplies:** cutters, chain-nose pliers, two-part epoxy such as Epoxy 330 (#60-230)

**To make this design:**

1. Mix epoxy as directed on the package. Dip backside of the rivolis into the glue and place them in the settings.
2. Let them dry thoroughly for the recommended time.
3. Use the 8mm round jump rings to connect the Hammertone links together in a series, as pictured.
4. Use oval jump rings to attach the 3 large Hammertone connectors and cross charms in the center, as shown.
5. Cut two 7" pieces of cord and insert the cord ends into the center-crimp tubes. Crimp with chain-nose pliers.
6. Connect the crimp-tubes with loop to the series of links using two oval jump rings.
7. Use the 6mm round jump rings to attach the fleur-de-lis charms and rivolis, as pictured.
8. Add the largest prong bail to the aqualine bead and attach this to the center link with two oval jump rings.
9. Use the remaining prong bails to attach the crystal pendants to the links.

**Jump-ring hint:**

When you open and close jump rings, twist sideways instead of "ovalling" them. This keeps their shape better, which makes them easier to close all the way.
