

## "Sweetheart" Resin Bangle

Created by: Selina Shehan

### Suggested Materials:

<u>Qty.</u>	<u>Stock #</u>	<u>Name</u>
1	82-585-95	Medium size resin bracelet mold (2 5/8" inner diameter)
1	82-500-08	8oz kit EasyCast epoxy

**Tools and supplies:** file, resin mixing set (#82-599), Castin'Craft mold release (#82-541-04), Castin'Craft resin spray (#82-530-5), Envirotex spray sealer (#82-525-12), Wetordry™ Polishing Paper assortment (#69-257-0000) candy such as candy heart sprinkles, Skittles, or POP ROCKS®

### TIPS:

- You can create about four to five bangles from one 8oz. resin kit.
- Consider coating candy and other items that might bleed color with a spray sealer (#82-525-12) before embedding them in resin.
- Always use the mold release. If you forget to use the mold release and items are stuck in the mold, place the mold in the freezer for a few hours then snap the resin free. Don't be afraid to be aggressive when removing the bangle from the mold.
- If you are mixing candy sprinkles into your resin, pour them into the mold first, and then pour the resin on top of them. Otherwise, they get weighed-down by the resin and immediately sink to the bottom of the mold.
- Use a file or rough sandpaper to remove any sharp corners, than wet sand with progressively finer grit papers to smooth. For a glossy protective finish, seal with Castin'Craft resin spray (#82-530-5).
